ing the last year one hundred and ricon patents were granted for agriculwere for harvesters, power reapers, mow-&c. The following abstract of this interesting department of invention. as axbibited in Patent Reports, as given in HARDWARE OF ALL RINDS,

not yet had the pleasure of seeing large ing. Persons purchasing at a Cash Store, will save from Twenty to Twenty to Twenty for per granted for improvements in plows, and granted for improvements in plows, and word to their profits for the loss of bad debts. "A four for cultivators. No less than 26 were granted for seed planters. This number is very large, considering that shows the importance of this class of machines, and the dissatisfaction enter. ained with those already in use. The devices patented, however, were mostly very large and well selected stock of American. confined to the mode of distributing seed -the novelties patented are said to be small, but that of B. D. Sanders, of Hollidays Cove, Va., for operating the shove rod to work the valves by friction rollers and rotary cam, is a very good one. Three patents were granted for horse rakes, and eight for threshers and separators; one of the latter consisted in having an inclined on triction rollers. This cylinder is full of holes, and as the straw is carried up, hand, a well-selected stock of hand, a well-selected stock of the grain falls down through the openings.

Ten patents were granted for hullers and and smut machines—one of them being for weaking a control of the second department of the second depart grain. One patent was granted for every style. His saloon is fitted up in suitable The weighing apparatus is secured in hand. Ciga's of different varieties, constantly on hand. such a manner to the machine, that when weight the balance tips the weighed grain. which is thrown upon inclined waves, and immediately starts off on a raffroad track to the grain depot. Four patents were granted for corn-shellers: in one the cloths, from I to 24 feet wide; also Stair, Table and Fnameled Carriage Cloths; ocoa, ble and Fnameled Carriage Cloths; the mass, as an elastic bed against the Canton and Brittania Matting. Mats of all k nds; pained Window Shades; buff Hol spiral shelling projections. Three patents lands; green and boff Oil Cloths, and Putnam's were granted for straw cutters, and nine for miscellaneous agricultural implements, rivalled assortment of Royal Veive', Brussels one of them boing for a metalic tube Tapestry, lugram and superfine car, etings; hall scythe snath.

TIMBER FOR POSTA .- The best timber for posts, in the order of durability, is red cedar, yellow locust, arbor vitæ, (for cents; list and Reg | argets; cotton and worl and chesthut. Charring posts of the more perishable sorts to render them durable, boats, hotels or dwelling hou as to the above, as is of little use; for the charred portions are made brittle, and the only part of the post possessing strength, it the interior, which is as liable to the changes of dryness and moisture as ever, through the porous charcoal. Salting posts-by boring a hole obliquely downwards at the surface of the earth, and plugging in salt. A. spectfully inform the citizens of Plyis far more effectual. Cases are known in this country of red cedar posts nearly a hundred years old, perfectly sound.

CORN HARVESTER .- The Herald, in enumerating various articles on exhibition in the Crystal Palace, has the follow-

Ream's pa ent corn harvester is another implement of agricultural life which will be interesting to farmers. This machine is very simple in its construction, and purports to cut, with the labor of one horse and a boy, from sixteen to twenty acres of corn per cay, and lay it in bundles of from The Knox County Mutual Ins. Company two to ten hills, as desired. An ingenious Richland County Mutual Insurance Company part of this machine, is an appliance called a dropper, by which he boy riding on the back of the horse can drop the bundles of corn at suitable distances in the furrows, all ready for shocking. The cost of this machine is reasonable-ranging from fifteen to twenty dollars. erty by applying to their agent, The speed of this machine is very desirable, as farmers consider it the best time Plymouth, Ohio. to cut corn when the dew is on the stalks, or immediately after a rain. In dry times the corn is brittle and difficult to cut. If vantage, and very valuable to farmers.
